

Video Transcript – Cray Kaiser’s Core Value: Integrity

- Dan:** What gets me motivated and gets me moving through the day is when I see our clients really appreciative and thankful for our services. If I'm able to see kind of their stress level decrease and are more comfortable with what's happening, I feel like I've done my job.
- Micah:** I was drawn to Cray Kaiser when I was looking for an internship and it ended up being a really good match. In the years, since then I've stayed here really because of the relationships I've built both with clients, with colleagues or with referral partners. Those relationships have been really the high point of my work at Cray Kaiser and the main reason for me staying here.
- Natalie:** What I enjoy the most about being on the Cray Kaiser team is that I feel that my opinion and my knowledge is always valued. I may not know everything, but I can certainly look and have others help me to find answers. I think we just truly embody what a team means.
- Dan:** There's a lot of bright and talented people here at Cray Kaiser, and one of our core values is care and education. So what do you think we like to do with some young, new staff that come through the doors here? We want to make sure that you continue to grow, you continue to learn and by doing so we help the client, we help you and we help each other.
